OBJECTIVE

AI-focused and full-stack developer with strong DSA foundation (130+ problems solved) and experience building scalable web/mobile applications. Interested in solving real-world problems through AI-driven and user-centric systems.

EDUCATION

Vellore Institute of Technology, Bhopal 2023 – 2027
Bachelor of Technology in Computer Science Engineering
CGPA: 8.76

TECHNICAL SKILLS

Programming Languages: Java , Python , C , C++
Web Development: HTML, CSS, JavaScript, React, Node.js
Databases: MySQL , Firebase
Tools: Git, Linux, AWS

PROJECTS

Yatra Genie – AI Travel Planner 2026

- Built a full-stack web app using React and Node.js for personalized itinerary generation.
- Integrated external APIs and optimized dynamic UI rendering.
- Implemented real-time data handling for user-specific recommendations.

Swasth Sync – Mobile Diagnostics for Remote Areas 2026

- Built a portable AI-powered diagnostic system using React Native, Firebase, and TensorFlow Lite to enable offline health data analysis in rural areas.
- Designed an offline-first architecture supporting sensor-based data collection, on-device inference, and cloud synchronization for remote consultations.

NariYug – Women Empowerment Digital Platform 2025

- Built a web platform aimed at supporting and empowering women through resources, awareness, and community features.
- Designed a responsive interface and structured content delivery for accessibility and engagement.

EXPERIENCE

Co-Founder - Revynt Dec 2025 – Present

- Co-founded a product clarity studio focused on reviewing early-stage startup websites for positioning, trust signals, conversion flow, and messaging effectiveness.
- Conducted structured clarity audits and delivered actionable reports with UX improvements, CTA optimization, repositioning strategy, and credibility enhancement recommendations.
